

## TEMPLATE FOR ADVERTISING RESEARCH POSTS

based on indications given by par. 4.4.1 of the  
"Report of the Working Group of the Steering Group of Human Resources Management under the  
European Research Area on Open, Transparent and Merit-based Recruitment of Researchers"

**Recruiting Department/Research Unit:** Department of Law

**Title:** The State and the Economy: Theoretical Issues and National Experiences during the Twentieth Century

### Offer description:

As part of the objectives of the Prin project 'Human Well-Being', the research activity will focus on the analysis and study of direct sources, both published and unpublished, in order to reconstruct the history of the economic and political thought that influenced state intervention in the Italian economy from the 1930s to the end of the century. This approach will make it possible to examine in detail the economic theories and political strategies that guided the institutional choices, providing a historical and theoretical context to understand the reasons why Italy initially adopted a model of state intervention in the Mezzogiorno inspired by Keynesian theories, and then moved towards a different economic conception. It will be crucial to identify the historical, cultural and political reasons that led to the emergence of state interventionism, as well as the factors that determined the transition to a more liberal approach, less inclined to direct intervention.

### Researcher career profile:

- *R1 First Stage Researcher (up to the completion of PhD)*
