

TEMPLATE FOR ADVERTISING RESEARCH POSTS

based on indications given by par. 4.4.1 of the

"Report of the Working Group of the Steering Group of Human Resources Management under the European Research Area on Open, Transparent and Merit-based Recruitment of Researchers"

Recruiting Department/Research Unit: Department of Education, Cultural Heritage and Tourism

Title: Learning Analytics. Across data processing ethics, instructional design and academic policy

Offer description - Funded by the European Union – Next Generation EU – PNRR mission 4, component 2, investment 1.1

The goal of the project is to elaborate Guidelines consisting of specific requirements (to be included in each of the University's Regulations) that will optimally regulate the use of Learning Analytics techniques, providing timely guidance regarding the possibilities of use and the ethical and regulatory constraints that define to which extent student data can be used for research and educational purposes. Research in the Learning Analytics field and the ethical implications of data processing has led some universities to issue specific regulations aiming to inform students about their data use and its limitations, but also to guide researchers in building analytics tools within those limitations. The purpose is to guide decision makers towards standard adoption of a system of rules designed to guide research in this field by engaging in dialogue with policy makers, data analysis experts and education designers and interpreting their requirements within a theoretical and normative framework. This will be pursued by implementing a mixed method research design conducted on a sample of universities.

Researcher career profile:

- R2 Recognised Researcher (PhD holders or equivalent who are not yet fully independent)
