

Corso di Dottorato in
**UMANESIMO E
TECNOLOGIE (UmanTec)**

James Blustein is a professor of Computer Science and Information Management at Dalhousie University. He earned his PhD from the (then named) University of Western Ontario in 1999 and has studied hypertext since the early 1990s and is deeply influenced by Doug Engelbart's vision of augmenting human intellect. Prof. Blustein's HAIKU (Hypertext Augmenting Intelligent Knowledge Use) lab pursues research about helping find and use information.
